------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

FIRE PROTECTION

Non-flammable.

In the event of a fire, use water spray, chemical powder, carbon dioxide (CO₂).

MEASURES IN CASE OF ACCIDENTAL SPILLAGE

Personal Protection: Wear personal protective clothing.

Environmental precautions: ventilation must be adequate in order to avoid the formation of irritating concentrations. Prevent infiltration into the subsoil/soil. In the event of infiltration into bodies of water or sewers, notify the competent authorities.

Cleaning methods: always follow good workplace hygiene practice. Avoid contact with the skin, eyes and clothing with the product. If contact occurs, wash with water. Clean all leaks promptly. Collect by mechanical means and dispose of the collected material as required by law.

HANDLING AND STORAGE

Do not create dust when processing the product. Accurate dust capture and accurate ventilation/suction in the workplace.

Take measures against electrostatic discharge.

Keep in a cool (below 30°C) and dry place. Avoid contamination, reducing agents such as lotions for perms. Do not store after mixing with developers and lightening lotions.

Containers may break. AVOID damp organic materials such as paper towels, wood, clothing,..., could give rise to spontaneous combustion.

Protect from heat and sunlight; Store away from rain and humidity and in any case never outdoors.

EXPOSURE CONTROL/PERSONAL PROTECTION

Precautionary measures: adequately ventilate the rooms where the product is stored and/or handled. Keep away from food, drink and fodder.

Respiratory protection: not necessary for normal use, a paper dust mask is recommended at most. Avoid inhalation. When the container is opened, protect your face. For prolonged exposure, use the mask for harmful dust.

Hand protection: Use protective gloves.

Eye protection: protective goggles. Avoid contact.

PHYSICAL AND CHEMICAL PROPERTIES

Physical state	Dust
Smell	Characteristic
Color	Characteristic
pH (dispersion in water 1g/1000 ml)	9.60-10.60
Own weight	0.70-0.88 g/ml
Water solubility	Partial

STABILITY AND RESPONSIVENESS

Normally stable at ordinary temperature.

TOXICOLOGICAL INFORMATION-HUMAN DATA

The preparation is not dangerous for humans because the hazardous substances present, whose use is authorized according to Law 11/10/1986 n. 712 and subsequent amendments and additions, are so in such quantities as not to cause danger.

Repeated skin contact can lead to the onset of irritative and/or allergic dermatitis.

ECOLOGICAL INFORMATION

Use the preparation according to good working rules, avoiding dispersing it into the environment.

Easily biodegradable preparation.

DISPOSAL CONSIDERATIONS

The product can be classified as hazardous waste.

Disposal of the preparation: incineration or landfill. Observe national and regional waste laws.

TRANSPORT INFORMATION

UN No: 1479

Transport by road/railway (ADR/RID-GGVS/E)

- | | |
|------------------------|---------------------------------------------------------------------------|
| - Class | 5.1 |
| - Pack | III |
| - Correct product name | Oxidizing solid, N.O.S. (Potassium Persulfate, Ammonium Persulfate, etc.) |

Transport by sea (IMO/IMDG)

- | | |
