PERSONAL PROTECTION/EXPOSITION CONTROL

Prior to the preparation and application of colour, always wear appropriate plastic gloves. The use of other material gloves isn't advised because they might cause allergic reactions and since they aren't suitable.

Always use clean accessories and avoid using nickel-plated tools.

Operate in well-aired rooms.

Avoid mixture with different or similar products produced by other companies or with different materials not foreseen on the instruction sheet.

General behaviour rules:

Continuous exposition to cleansing agents (soap, shampoo, liquid cleanser) for professional reason may cause a depletion of the lipid coat and the corneus layer, which constitute the natural barrier of the skin. The depletion of this barrier may cause skin injuries and its exposure to the external agents. Under these conditions the handling of other products, normally used during the professional activity, without proper devices may cause an intolerance that may lead to heavier forms.

When the employer identifies risks not avoidable with other devices, he must give to the employees Individual Protection Devices (IDP) (Art. 43 D.Lgs 626/94). IDP must be complaint with the rules laid by Decreto Legislativo 475/92 (art. 42 D. Lgs 626/94). Use of IDP provided by the employer is compulsory (art. 5 e 44 d. Lgs 626/94).

Prior to the preparation and application of colour, always wear appropriate disposable plastic gloves.
