------------------------------------	---

FIRE PROTECTION

Non-flammable.
In the event of a fire, use water spray, chemical powder, carbon dioxide (CO₂).

MEASURES IN CASE OF ACCIDENTAL SPILLAGE

Pick up the spilled product and wash with water. Never put the spilled product back into the original container for use.

HANDLING AND STORAGE

Store in dry and well-ventilated places.
Do not expose to heat or temperature below 5°C.

EXPOSURE CONTROL/PERSONAL PROTECTION

General rules of conduct:

Continued exposure for occupational reasons to cleansing agents (soap, shampoo, liquid detergents) can cause an impoverishment of the lipid mantle and stratum corneum, which constitute the skin's natural barrier. The impoverishment of this barrier can cause lesions of the skin, which is thus more exposed to external agents. In these conditions, the handling of other products, normally used during professional activity, done without the necessary precautions, can be the cause of intolerance that in the long run could lead to more serious forms.

In the event that the Employer identifies risks that cannot be avoided by other means, it is required to make adequate Personal Protective Equipment (PPE) available to workers (Art. 43 of Legislative Decree 626/94). PPE must comply with the standards provided for by Legislative Decree 475/92 (art. 42 Legislative Decree 626/94). The use of PPE provided by the Employer is mandatory (Articles 5 and 44 of Legislative Decree 626/94). In this specific case, during all phases of application, handling and final rinsing, use disposable plastic gloves (e.g. polyethylene or nitrile).

PHYSICAL AND CHEMICAL PROPERTIES

Physical state	Gel cream
Smell	Characteristic/non-ammonia
Color	Characteristic
ph	9.50-10.50

STABILITY AND RESPONSIVENESS

Normally stable at ordinary temperature.

TOXICOLOGICAL INFORMATION-HUMAN DATA

The preparation is not dangerous for humans because the dangerous substances present, whose use is authorized according to the Cosmetic Regulation 1223/2009 and subsequent amendments and additions, are so in such quantities as not to cause danger.

Repeated skin contact can lead to the onset of irritative and/or allergic dermatitis.

ECOLOGICAL INFORMATION

Use the preparation according to good working rules, avoiding dispersing it into the environment.

Easily biodegradable preparation.

DISPOSAL CONSIDERATIONS

The product can be classified as hazardous waste.

Disposal of the preparation: incineration or landfill. Observe national and regional waste laws.

TRANSPORT INFORMATION

Keep away from food and beverage containers.

Transport: RID, ADR, ICAO, IMO, IMDG: not applicable.

REGULATORY INFORMATION

Non-hazardous preparation.

The preparation complies with the rules of the Cosmetic Regulation 1223/2009 and subsequent amendments and additions. The rules of Regulation 1272/2008 on the classification, packaging and labelling of dangerous preparations do not apply to cosmetic products in their finished state, intended for end use.

OTHER INFORMATION

Do not apply to undamaged, irritated or diseased scalp.

Carefully read the instructions for use on the product packaging.
